DETAILED ACTION

Reasons For Allowance

1. Claims 1-2, 4-6, 29-34, 36-63 are allowed.

2. The following is an Examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claimed invention of classifying the users of a web site, as claimed by Applicant. Specifically:

a) independent claim 1 teaches a system for classifying users wherein one or more properties are identified that reflect whether the users viewed a particular web page and

b) independent claims 29 and 59 teach a method and system, respectively, for classifying users wherein the actions of the user in selecting particular products are used in the classification.

The closest prior art of Brown et al (U.S. Patent Number 5,557,686; dated 09/17/1996; class 382; subclass 115) teaches a system for classifying users but fails to teach or suggest one or more properties that are identified which reflect whether the users viewed a particular web page, as found in claim 1 nor does it teach the use of the actions of the user in selecting particular products to perform the classification as found in claims 29 and 59. To the extent that these features are not found in the cited prior art, the present case is held to be allowable over the art of record.

Art Unit: 2121

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
